Your Name

Today's Date

FORMATIVE

- grayscale 440-by-400, say again: four hundred **forty** -by- four hundred
- two circle **objects** both centered at (200,200) radius 40 and radius 120
- background: right 200 pixels 170 light gray, left 200 black, middle 40 white
- dark gray 85 any pixel inside the bigger circle but not in the smaller circle
- **but** if the x-coordinate is >= 200 then shift those dark grays 40 to the right
- result is the middle 40 white pixels will form a gap between the two sides

SUMMATIVE

- color 640-by-480 image as a PPM
- alternating horizontal stripes red-green-blue-red-green-... use "soft" colors below
- each stripe is six pixels thick
- the very top red stripe is offset by three pixels so that we only see half of it
- twelve circles drawn over top of the stripes
- read coordinates of centers from TXT file - radius 40
- circles are tan = hex C8 B0 A5 = rgb (200, 176, 165)
- red D9 00 12 (217, 0, 18) green 23 9F 40 (35, 159, 64) blue 00 33 A0 (0, 51, 160)
